

## The Life Cycle of the Butterfly

Once again, we have managed to observe the life cycle of the butterfly. We received five tiny black caterpillars which we watched get fatter and fatter by the day. They then formed their chrysalis where they transformed and emerged as beautiful Painted Lady butterflies, which we have since released in the school grounds.

**Remember to take part in the Big Butterfly Count  
which runs from 14th July to 5th August!**
